

How To Room Reserve-Create a custom view

Article Number: 104 | Rating: Unrated | Last Updated: Wed, Apr 17, 2013 at 4:51 PM

Create a custom view in Room Reserve: This is an example of the path to your calendar as seen by patrons:

<http://demo.evanced.info/events/lib/roomrequest.asp>

To show reservations in a monthly "calendar" view, the path becomes:

<http://demo.evanced.info/events/lib/roomregeust.asp?vm=m>

where "vm" stands for view mode, and "m" is monthly. The "libnum" switch and others, listed in the table below, can be used to show reservations at a specific branch:

<http://demo.evanced.info/events/lib/roomrequest.asp?vm=m&libnum=2>

The switches (everything after "?") tell the system what to display and how to display it. The table below provides a reference for deciphering the switches.

vm=	Tells the system what format to use when displaying reservations. "w" for week, "m" for month and "s" for search.
libnum=	This is used to view the rooms for a given library. Use the library number (libnum=x) or "999" (all libraries) to be displayed or all (999).
AllBranchRoomsChecked=	This is used to pre-select all of the rooms in a given branch. Branch 0 is used. This option is only useful if the view is "m" for month or "s" for search. =1(true) =0(false)
AllRoomsCheck=	This is used to pre-select all of the rooms in a given view. This option is only useful if the view is "m" for month or "s" for search. =1(true) =0(false)
Room=	This is used to pre-select a room in the selected view. room=0 is used. This switch can cause trouble when adding a room will change the room number. =x (where x = room ID number)
HideDay=1	This is used to hide the Day tab.
HideWeek=1	This is used to hide the Week tab.
HideMonth=1	This is used to hide the Month tab.
HideSearch=1	This is used to hide the Search tab.
