
Server Requirements

Article Number: 143 | Rating: Unrated | Last Updated: Thu, Jul 16, 2015 at 8:54 AM

It is only important to understand the server requirements for a system that is installed on your server. For hosted systems, your interface to the software is entirely through a browser. **Standard Library (less than 400 events/reservations per month or less than 10,000 reading registrants)** Operating System:

Windows Server 2008, or 2008 R2 (Can be a shared server. However, performance will depend on resources used by other software installed on the server.) Processor: 2.0 GHz or higher RAM: 2 GB minimum (4 GB or above better) Hard Drive: 50MB of free space Microsoft IIS v6, v7, or v7.5 Execute Permissions should be set to "Scripts Only" Web Server Extensions must have Active Server Pages set to "Allowed". Port 80 must be open MySQL " Version 5.0.67 - Evanced staff will provide download link for installation. Installed on the root of the largest available drive" MyODBC " Version 3.51.12 -" Evanced staff will provide download links for installation. " **Larger Libraries (over 400 events/reservations per month or over 10,000 reading registrants)** Operating System: Windows Server 2008, or 2008 R2 (Dedicated server) [Will work with 32 bit and 64 bit systems]. Processor: 2.6 GHZ or higher RAM: 4 GB minimum (8 GB or above better) Hard Drive: 100 MB of free space (15K RPM Drive better) Microsoft IIS v6, v7, or v7.5 Execute Permissions should be set to "Scripts Only" Web Server Extensions must have Active Server Pages set to "Allowed". Port 80 must be open MySQL " Version 5.0.67 - Evanced staff will provide download links for installation. Installed on the root of the largest available drive MyODBC " Version 3.51.12 - Evanced staff will provide download links for installation.
