

## **Is there a way to pull events data from Events to another page and/or choose what programs a calendar page displays?**

Article Number: 246 | Rating: Unrated | Last Updated: Thu, Oct 27, 2011 at 11:58 AM

This article will explain how to pull and show data in the events calendar. It will explain RSS and XML feeds and how to integrate them with Events and other software.

To pull data from the Event Calendar to another page, refer to the article below. It will explain and walk you through of how to pull data and display it.
