To add a new age group, access the **Age Group List on the [Events System Maintenance page](#)**.

Simply input whatever you want to call the group (ie Children, Toddlers, Teens, Seniors, Adults, ect.)

Then assign a weight to the name depending on how high you want it to appear in a list.

Weights are assigned in multiples of 10, with lower numbers appearing higher in the list. A sample list would look like this:

Age Group	Weight
Toddlers	10

On the right hand side, you can delete a group or edit it by clicking on its name

Custom Fields

- **Applicable To:** All Users
- **Attachments:** No
- **Summary:** create a new age group classification
