Using SmartPay or SecurePay with the E-Commerce Module

Article Number: 524 | Rating: Unrated | Last Updated: Wed, Oct 14, 2015 at 3:30 PM Among the options for libraries using our <u>e-commerce module</u>Â are SmartPay and SecurePay. Both are third party processors that work similar to a system like PayPal.

When you enable the SecurePay option a number of things happen when the patron transaction occurs. $1.\hat{A}$ \hat{A} \hat{A} \hat{A} \hat{A} \hat{A} \hat{A} \hat{A} Our system redirects the patron to SecurePay's payment page $2.\hat{A}$ \hat{A} \hat{A} \hat{A} \hat{A} On SecurePay's payment page, the user will enter his or her information (i.e. name, credit card info, etc.) $3.\hat{A}$ \hat{A} \hat{A} \hat{A} \hat{A} After the patron pays or cancels the transaction, he or she will be redirected back to Events or Room Reserve $4.\hat{A}$ \hat{A} \hat{A} \hat{A} \hat{A} \hat{A} Then Events or Rooms shows the user the confirmation page Remember that both SecurePay and SmartPay are third-party vendors, and you need to have an account with those services in order to activate it in your e-commerce module. Note Evanced uses the SecureFrame method to connect to SecurePay's interface.

If you are interested in adding e-commerce to your system, contact sales@evancedsolutions.com. Â For help configuring your e-commerce module, review our article on configuring third-party e-commerce Â or contact Evanced Support. Â Â
