

How To Room Reserve-Create a custom view	
Article Number: 104 Rating: Unrated Last Updated: Wed, Apr 17, 2013 at 4:51 PM	
<p>Create a custom view in Room Reserve: This is an example of the path to your calendar as seen by patrons:</p> <p>http://demo.evanced.info/events/lib/roomrequest.asp</p> <p>To show reservations in a monthly "calendar" view, the path becomes:</p> <p>http://demo.evanced.info/events/lib/roomregeust.asp?vm=m</p> <p>where "vm" stands for view mode, and "m" is monthly. The "libnum" switch and others, listed in the table below, can be used to show reservations at a specific branch:</p> <p>http://demo.evanced.info/events/lib/roomrequest.asp?vm=m&libnum=2</p> <p>The switches (everything after "?") tell the system what to display and how to display it. The table below provides a reference for deciphering the switches.</p>	
vm=	Tells the system what format to use when displaying reservations. "w" for week, "m" for month and "s" for search.
libnum=	This is used to view the rooms for a given library. Use the library number (libnum=x) or "999" (all libraries) to be displayed or all (999).
AllBranchRoomsChecked=	This is used to pre-select all of the rooms in a given branch. 0 is used. This option is only useful if vm="s". =1(true) =0(false)
AllRoomsCheck=	This is used to pre-select all of the rooms in a given view. =1(true) =0(false). If view is "m" for month or "s" for search. =1(true) =0(false)
Room=	This is used to pre-select a room in the selected view. room=0 is used. This switch can cause trouble when adding a room will change the room number. =x (where x = room ID number)
HideDay=1	This is used to hide the Day tab.
HideWeek=1	This is used to hide the Week tab.
HideMonth=1	This is used to hide the Month tab.
HideSearch=1	This is used to hide the Search tab.
