Spaces XML Feed

Article Number: 720 | Rating: Unrated | Last Updated: Mon, Aug 19, 2019 at 10:03 AM

Spaces allows you to create custom XML/RSS feeds. Â An example feed of Â
http://demozonepublic.evanced.info/spaces/patron/spacesxml?dm=xml&loc=7&limit=5Â will pull in reservation data, limiting the results to the first five reservations ("limit=5"), for the Activity Room ("loc=7") in the Main Library on our demo site. Â *Note: the Spaces XML feed currently only returns data for one day. You can change the specific day for which you'd like to receive reservation data via the Â **ds=** switch or the Â **do=** switch, but you cannot receive more than one day of reservation data at a time.*

To build your feed, take your base URL, add a **?**, then add Â **dm=XYZ** to determine the type of feed you are creating (where **XYZ** is XML, RSS, etc.)

 http://[Your URL].evanced.info/spaces/patron/spacesxml?dm=xml You can add additional parameters by adding a Â **&**Â character followed by a parameter. For example:

 http://[Your URL].evanced.info/spaces/patron/spacesxml?dm=xml&lib=1000 Â   Display Mode - **dm= xml**, **exml**, **html**, or **ical**   Date Start - **ds=** AÂ date value Â in YYYY/MM/DD format   Date Offset - Â **do= any integer value**Â - accepts positive and negative values example: Â **do=7**Â returns reservations on the day 7 days from "now" example: Â **do=-30** returns reservations on the day 30 days prior to "now"   Specific Locations (branches) - Â **lib= 1**Â for single, where Â **1**Â is the library ID. **0,999,1003,1009,1016**Â for multiple, where these numbers are the library IDs. Do not put spaces between commas and IDs. **all**Â indicates "all branches" (i.e. system-wide would be lib=all) Branch IDs start in the 1000s as shown above. Your branch IDs may vary.   Specific Spaces (rooms) - Â **loc= 1**Â for single, where Â **1**Â is the room ID. **1,2,4,6,23**Â for multiple, where these numbers are the room IDs. Â Do not put spaces between commas and IDs.   Start count - Â **startcount=** What item we want to start on - for paging a resultset.   Result limit - Â **limit=** How many results come back - to limit the amount we get.   Reservation Status - Â **status=**
  = Pending **1** = [Default] Approved

Please note that Evanced's support is limited to the functionality of the Â Spaces XML/RSS feeds and the way it looks independently. Evanced does not provide support for implementing the Â XML/RSS feeds on your site, nor does it provide support for Â XML/RSS feeds after installation on your site.

Custom Fields Applicable To: Admin Users**Attachments:** No**Summary:** xml feed for Spaces
